

12/11/24

## Knowledge Base:

- R1: Alice is the mother of Bob.
- R2: Bob is the father of Charlie.
- R3: A father is a parent.
- R4: A mother is a parent.
- R5: All parents have children.
- R6: If someone is a parent, their children are siblings.
- R7: Alice is married to David.

## Hypothesis

Charlie is a sibling of Bob.

## Entailment Process

From the premise, Bob is the father of Charlie and the fact that if someone is parent, their children are siblings, so Charlie is not a sibling of Bob.

Conclusion: Charlie is ~~not~~ a sibling of Bob

## Propositional Logic

1    V

- 1) Alice is the mother of Bob and A mother is a parent so  
Alice is a parent
- 2) Bob is the father of Charlie and A father is a parent so  
Bob is a parent
- 3) If someone is a parent, their children are siblings  
Alice and Bob are parent, so their children

are siblings

Alice Bob is child of Alice.

Charlie is child of Bob

Therefore Bob and Charlie are siblings.

Conclusion

Charlie is a sibling of Bob.

$R1 \rightarrow R4$ : Alice is parent (P)

$T \rightarrow T \Rightarrow T$

$T \rightarrow F \Rightarrow F$

$F \rightarrow T \Rightarrow T$

$F \rightarrow F \Rightarrow F$

$P \rightarrow Q \Rightarrow T$

$\underline{P1} \rightarrow \underline{P4} \rightarrow \underline{T}$

F

$R2 \rightarrow R3$ : Bob is parent (Q)

$P \rightarrow Q$ : Alice, Bob are parents (R)

$R \rightarrow R6$ : Bob and Charlie are siblings.
